

FACULTY OF SCIENCE
M.Sc. (CBCS) II Semester Examination, December 2021

Subject: Microbiology
Paper – II : Environmental & Agriculture Microbiology

Time: 2 Hours

Max. Marks: 80

PART – A

Note: Answer any five questions.

(5 x 7 = 35 Marks)

- 1 Sanitation quality of water
- 2 Water-borne pathogenic micro-organisms
- 3 Biodegradable plastics
- 4 Bioaugmentation
- 5 Humus formation
- 6 Carbonaceous Materials in soil
- 7 Rhizosphere
- 8 Mycorrhizae

PART – B

Note: Answer any three questions.

(3 x 15 = 45 Marks)

- 9 Write an essay on Anaerobic sewage treatment methods.
- 10 Explain the Aerobic sewage treatment methods.
- 11 Discuss the role of microorganisms in the degradation of organic pollutants.
- 12 Give a detailed account on enumeration and activity of microbes in soil.
- 13 Write an essay on microbial mechanism of Denitrification.
- 14 Explain the factors governing the decomposition of organic matter.
- 15 Write an essay on different types of Biofertilizers.
- 16 Give a detailed account on symbiotic and Asymbiotic nitrogen fixation.

FACULTY OF SCIENCE
M.Sc. (CBCS) II Semester Examination, December 2021

Subject: Microbiology
Paper – III : Immunology

Time: 2 Hours

Max. Marks: 80

PART – A

Note: Answer any five questions.

(5 x 7 = 35 Marks)

- 1 Write about Clonal selection theory.
- 2 What are the types of antigens?
- 3 What is the role of Toll like receptors in immune response?
- 4 What are the symptoms and features of SLE?
- 5 Describe the reactions occurring during anaphylaxis.
- 6 What is RIA?
- 7 Classify and describe Tumour antigens.
- 8 What are Chimeric Antibodies and their applications?

PART – B

Note: Answer any three questions.

(3 x 15 = 45 Marks)

- 9 Explain Antibody structure, functions and classification.
- 10 What are Primary lymphoid organs? Summarize their functions in immune system.
- 11 Write notes on Major Histocompatibility complex and Human leucocyte antigen (HLA).
- 12 Comment on cell-mediated and humoral immune responses.
- 13 Define and classify Antigen-Antibody reactions. Discuss ELISA tests with clinical examples.
- 14 Explain about Classical and alternate Complement pathways.
- 15 Write about the types of recombinant vaccines.
- 16 Discuss the production of monoclonal antibodies and add a note on their applications.
